THE CLEVER SHELVING SYSTEM

Boltless, adjustable & galvanised

The HI280 Shelving system

The shelves are quick to assemble and the range of accessories can easily be attached, in most cases without the need for additional fixing.

Various frame heights and shelf depths are available and you can construct the system according to your individual needs. Once constructed you are free to use your new shelving system for all your storage requirements.

Due to the high quality finish and galvanized surface of the system, HI280 is a long lasting and extremely durable solution. Whether you simply need standard shelving for your warehouse, want to expand your existing system, or to rebuild, then talk to us and we can offer endless options at a competitive price.

More information see:
