- Maxi Bins to suit shelf sizes
- Popular sizes normally available from stock
- Components still available to extend shelving systems supplied from 1968

Impex is the original solution for a simple bolt-free bay of shelving or a complex two tier or high rise order picking installation. Impex is ideal for interfacing with up to the minute computer controlled systems and is designed and manufactured to ISO9001 and is fully compliant with SEMA standards.

Impex, now 40 years old, is a versatile modular industrial shelving system, simple to design, economical and easy to assemble. Its high versatility means it caters from the small component to heavy cartons. The bolt-free lock-in construction system means that no time is lost in assembly. These features combine to ensure that you'll never grow out of your Impex, its easy to adjust or extend to keep pace with your changing storage requirements.

Versatile Modular Shelving System

Open or fully clad options.

Impex is ideal for storage of variable sized components.

When there are so many things to be stored and so many ways of storing them, you need to be confident that you choose the right solution for your application.

Maximum cubic capacity is achieved with Impex mounted on mobile bases.

Simple to design, economical and easy to assemble
