

Project Management

With a wealth of project management and installation experience Dexion is able to deliver everything from a single product to a turnkey solution to its customers.

In all cases full consideration is given to;

- Performing all work in accordance with agreed methods, instructions and specifications
- Working in partnership with other contractors to deliver the best solution
- Being flexible to accommodate changes to requirements
- Providing full documentation and certification of the installed product in compliance with local regulations and laws

Safety is an absolutely essential part of the delivery and installation of our products to our customers. Every effort is taken to ensure safe working practice in all areas of the project fulfillment in line with industry best practice and in consideration of local health and safety legislation. In addition our broad geographical presence helps us ensure that we are up to speed with local requirements and regulations in all areas of our product installation.
